Ladies and Gentlemen,

The year is coming to the end and we all know that 2009 was one year of full challenges! Therefore, we are glad to be able to serve you with our on demand solutions which are geared to the ever higher technical requirements and to tightening budgets.

In order to be informed next year about the opportunities offered by Software as a Service (SaaS), today we are presenting to you our current projects, customers and partnerships.

We are looking forward to the new year with confidence and we shall take the opportunities of 2010. In this sense, we wish you a pleasant Advent, a Merry Christmas, and a successful and happy New Year!

Enjoy reading!

Marcus Hartmann Wolfgang Maas

- NEWS
How can you make your billing management more effective?

Are you wondering whether it would make sense for your company to switch from manual to digital billing process?

Together we conduct with you a non-binding potential analysis to investigate the possibilities of your company's billing management. Gain an insight into the matter and pose all questions about this topic, which are interesting to you. As a result of the analysis, you will receive a profitability view on your company after the investigation.

Take advantage of this opportunity and ask for information without any further obligation for you.

- OXSEED IN GENERAL
The sales department OXSEED presents itself

We know that it is more pleasant when you have a picture of the person in mind with which you speak. For this reason, we introduce to you the sales team of OXSEED.

Get to know the internal and external sales of OXSEED and find out who your contact persons are!

• CUSTOMER REPORTS

VRSG once again opted for OXSEED

VRSG is one of the leading IT companies for cantonal, town and municipal authorities in Switzerland.

The collaboration with OXSEED has begun a few years ago with the product AFP2web®. At the time, the conversion from AFP data to TIFF was the main issue. The TIFF archive of VRSG imposed requirements on the structure of incoming documents which could be mapped to 100% using AFP2web®.

Due to the evolving requirements for software solutions, VRSG now opted for the latest transformation solution of OXSEED. Fully automatically, word documents are extracted from a spool file and converted to TIFF. Thereby, the index data are processed simultaneously and the output / directory structure is built. We are happy to support a reputable service provider to offer a new service based on our technologies.

Electronic documents securely signed with Mentana & OXSEED

In today's world, the digital signature is an essential component for the electronic processing of business content. If an invoice is sent electronically, the origin and integrity of the content have to be guaranteed anytime. OXSEED guarantees this by a qualified and electronic signature of Mentana.

Through this signature, the authenticity and integrity for all documents in the archive is guaranteed. With the combined solution of Mentana & OXSEED you are on the safe side.
